SUMMARY

- Final-year Computer Science Engineering student passionate about UI/UX design, front-end development, and a strong openness to learning and working in other technical fields.
- Skilled in Figma, HTML and CSS, with foundational knowledge of Python, C, and Java.
- Strong understanding of design principles, user experience, and responsive web design.
- Recognized as a fast learner with excellent problem-solving and analytical abilities.
- Eager to apply creative and technical skills in a dynamic, growth-oriented environment.

EDUCATION

Bachelor of Engineering (BE) Computer Science and Engineering Ponjesly College of Engineering, Nagercoil	90.9%	2026
Higher Secondary Duthie Higher Secondary School for Girls, Nagercoil	88.5%	2022
High School Duthie Higher Secondary School for Girls, Nagercoil	92.2%	2020

INTERNSHIP EXPERIENCE

Java Intern, Besant Technologies, Chennai • Gained hands-on experience in core Java concepts. • Applied modular programming and solved real-world coding problems using Java • Followed best coding practices and learned real-world development processes.	August 8 - October 11, 2025
UI/UX Design Intern, Feather Softwares, Nagercoil • Conducted UX surveys via Google Forms • Created user personas, empathy map, and user journey maps • Designed wireframes, prototypes, and UI for a mobile app in Figma • Benchmarked existing design solutions	July 1 – July 30, 2025
Web Development Intern, JClick Solutions, Nagercoil • Developed responsive web pages using HTML, CSS and JavaScript • Structured and styles front-end layouts with a focus on UX • Gained exposure for bootstrap for building UI components	February 3 – February 14, 2025
Web Development Intern, Vecto Tech Consultancy Services, Hyderabad • Analyzed Amazon datasets for key insights and trends • Visualized data using Python in Jupyter Notebook • Utilized basic analytical techniques for interpretation	March 1 – March 22, 2024

PROJECTS

Library Management System | Internship Project

Role: Developer | **Technologies:** Java, MySQL, HTML, CSS, JavaScript

- Developed a Java-based application to manage library records, including book issue, return and update
- Integrated MySQL database using JDBC for secure and efficient data storage and retrieval.
- Implemented OOP principles and implemented error handling for reliable system performance.
- Focused on modular design to enhance maintainability and scalability of the system.

Skillverze | Internship Project

Role: UI/UX Designer | **Tool:** Figma

- Designed an interactive mobile application prototype that enables users to swap skills — allowing them to both teach and learn from each other.
- Created user-friendly wireframes and mockups focusing on accessibility, visual appeal, and intuitive navigation.
- Collaborated with the development team to ensure design consistency and smooth user experience.

CERTIFICATIONS

- Cybersecurity Fundamentals - IBM
- Introduction to Generative AI - Google Cloud
- Generative AI in Action - IBM
- Encryption Basics - Great Learning
- Cyber Forensics - Great Learning
- Types of Cybersecurity - Great Learning
- UI/UX for Beginners - Great Learning
- Introduction to Artificial Intelligence - Great Learning

SKILLS

Soft Skills

- Problem Solving
- Adaptability
- Attention to Detail
- Perseverance
- Time Management
- Receptive to Guidance

Technical Skills

- Design & UX Tools: Figma, Canva, Google Forms
- Web Technologies: HTML, CSS, JavaScript
- Programming Languages: Familiar with Python, C & Java
- Data Tools: Jupyter Notebook
- Languages: English, Tamil

ACHIEVEMENTS

3rd Place, Idea Presentation (Poster)– Avernora'24, National Level Technical Symposium
Department of AI&DS, Arunachala College of Engineering, 2024

3rd Place, Quiz Competition – Master Brain'24
Department of Humanities and Science, Ponjesly College of Engineering, 2024

Pursuing Honors degree along with regular B.E. Computer Science and Engineering curriculum.
